Mass Revolt, Health Conditions and Leading Distress Cured by Jottings

By Shomit Sirohi

I. Humanism, and practical Humanism – why the Political Left is then only Communist international and this then is followed as in fact generalising at its Fanonian style

What is actually a healthcare crisis in women's lives and many such families then is resolved by Sirohi in actual steps of a leader – he reduces it to simple steps which then totalise well because led by a doctor and leader which revolts in general strikes as well to produce a syntax called a successful revolution aiding Cuba, Algeria and China even Israel in the intertanglement – which is why it still throws up questions on humanism and healthcare in fact which has to be followed according to Sirohi's far left orientation by journalistic jottings, that's all.

Though most people follow his model of health and lifestyle which wins it for them easily – he is an essential leader following others in history as successful as well – a lot of leaders are now worried about their healthcare but are planning it to excellence with Sirohi's perfect teaching on health.

II. Journalism with some Prophecy

I sketch this recent arc which then is with a sketch within it of a contradiction for the last year or month of course which is about in phases – healthcare contradiction as it means healing them as a practical ensemble dialectics which can be called a non-principal and irrelevant contradiction but has some relevance of course of a health meaning in fact – what is called a type of contradiction as Mao argues called non-antagonistic but real, health and real crisis ridden dynamic contradiction in need of justice.

So in fact one can guage that it is a dynamic crisis this life the women lead actually and Sirohi with them is possible because it is a dialectic – Sirohi calls this facticity and transcendence together.

Now in fact prophetic remarks are that the principal actor is leading again tomorrow as a slogan because the process of dialectical ensemble is now producing idle-problems of sleep and waking up – a weak contradiction, and consistently weakening into perfect life.
